CONTENTS

Special Issue: Molecular Aspects of Systems of Biological Interest - A Collection of Invited Papers in Honour of Professor Giorgio Careri

Part I

Giorgio Careri: The early years and the birth of low temperature physics in Italy
F. Moss (St. Louis, MO, U.S.A.).....1

Induced Order in Open Physical Systems: Physics and Thermodynamics of Mesoscopic systems

Nonequilibrium states and long range correlations in chemical dynamics
G. Nicolis, A. Amellal, G. Dupont and M. Mareschal (Brussels, Belgium).....5

The dynamical character of biochemical transformations: from protein motions to metabolic "field structure"
G.R. Welch (New Orleans, LO, U.S.A.).....21

Linkage as process and paradox
E. di Cera (Rome, Italy) and J. Wyman (Boulder, CO, U.S.A.).....33

Non equilibrium oscillatory relaxation processes across biological membranes
A.M. Liquori (Venice, Italy).....43

Theory of condensed state as a hierarchial system of quasi-particles formed by phonons and three-dimensional de Broglie waves of molecules. Application of the theory for description of thermodynamic properties of water and ice
A.I. Käiväräinen (Petrozavodsk, U.S.S.R.).....53

Solitons and other Coherent Processes in Systems of Biological Interest

Nonlinear quasiparticles in hydrogen-bonded systems
St. Pneumatikos (Crete, Greece), G.P. Tsironis (La Jolla, CA, U.S.A.) and A.V. Zolotaryuk (Kiev, U.S.S.R.).....85

Local modes in molecules
A.C. Scott, L. Bernstein (Tucson, AZ, U.S.A.) and J.C. Eilbeck (Edinburgh, Gt. Britain).....105

On a generalized discrete self-trapping equation
P.L. Christiansen (Los Alamos, NM, U.S.A.).....113

A study of vibron solitons
X. Wang, D.W. Brown and K. Lindenberg (La Jolla, CA, U.S.A.).....123

Optical anomalies in acetanilide: Davydov solitons, localised modes, or Fermi resonance?
M. Barthes (Montpellier, France).....143

Coherent dynamics in biomolecular systems
W. Rhodes (Tallahassee, FL, U.S.A.).....165

Molecular Dynamics of the Liquid State and Systems of Biological Interest

Structure and dynamics of water between segments of parallel DNA molecules
M. Rami Reddy, K. Foster and M. Berkowitz (Chapel Hill, NC, U.S.A.).....181

Molecular dynamics simulation of protein hydration: studies on tuna ferrocytochrome-c and bovine erythrocyte superoxide dismutase
C.F. Wong, J. Shen, C. Zheng, S. Subramaniam and J.A. McCammon (Houston, TX, U.S.A.).....193

Brownian simulation of cytochrome c551 association and electron self-exchange
R.G. Herbert and S.H. Northrup (Cookeville, TN, U.S.A.).....207

Cross correlation functions in protein dynamics and function
M.W. Evans (Egham, Gt. Britain).....223

Computer simulations of hydrated proteins
E. Clementi (Kingston, NY, U.S.A.).....233

Energy exchanges between proteins and thermal bath
F. Wanderlingh (Messina, Italy).....241

The mesoscopic physics of water and other complex systems
D. Bertolini, M. Cassettari, P. Grigolini, G. Salvetti and A. Tani (Pisa, Italy).....251

Dielectric studies of protein hydration
P. Pissis (Athens, Greece).....271

A theoretical model of the sequence dependent superstructures of DNA
P. De Santis, G. Gallo, A. Scipioni and M. Savino (Rome, Italy) and A. Palleschi (Potenza, Italy).....291

Dielectric medium interactions in proton-transfer and charge-transfer molecular electronic excitation
J. Heldt (Gdansk, Poland) and M. Kasha (Tallahassee, FL, U.S.A.).....305

Conformational flexibility in DNA: ion mediated interactions and the shape of genes
S.M. Lindsay (Tempe, AZ, U.S.A.).....315

Dynamic light scattering from DNA plasmids: diffusional and internal motion
G. Chirico and G. Baldini (Milano, Italy).....327

Molecular motions and local order in water and aqueous solutions
M.P. Fontana and B. Rosi (Parma, Italy).....347

The conformation of the duplex of the dodecamer, d(CGCGAATTCGCG) as a model for DNA in the liquid state
W.L. Peticolas, G.A. Thomas and Y. Wang (Eugene, OR, U.S.A.).....367

Part II

Theory of Thermally Activated Rate Processes, Protein Fluctuations and Solvent Viscosity Effects

Beyond the fluctuating enzyme: the Brownian motion picture of internal molecule motion
C. Blomberg (Stockholm, Sweden)..... 1

Diffusive coupling of internal and solvent coordinates in conformational transitions involving electron transfer
G. Giacometti, P.L. Nordio, A. Polimeno (Padua, Italy) and
G.J. Moro (Parma, Italy)..... 19

Activity and viscosity effects on the structural dynamics of globular proteins in mixed solvent systems
A. Rosenberg, K. Ng and M. Punyiczki (Minneapolis, MN, U.S.A.)..... 31

Steady-state fluorescence quenching as a tool to study protein dynamics
B. Somogyi, Zs. Lakos, S.Damjanovich (Debrecen, Hungary) and
A. Rosenberg (Minneapolis, MN, U.S.A.)..... 45

Macromolecular fluctuation and biological function
G. Szabó, B. Somogyi and S. Damjanovich (Debrecen, Hungary)..... 59

Enzymatic activity in reverse micelles - some modellistic considerations on bell-shaped curves
M. Maestro (Bari, Italy)..... 71

Biophysical and Biochemical Aspects of Protein Dynamics

Physico-chemical studies of the activity of urease and the development of a conductimetric urea sensor
B.A. Lawton, R. Pethig (Bangor, Gt. Britain), Z.-H. Lu and Y. Wei (Nanjing, China)..... 83

Dynamics of genetically-engineered enzymes: fluorescence and depolarized Rayleigh scattering studies of yeast phosphoglycerate kinase
A. Cooper, B. Sanders (Glasgow, Gt. Britain) and D.T.F. Dryden (Newcastle, Gt. Britain)..... 99

Dynamical factors in protein - protein association
R. Lumry (Minneapolis, MN, U.S.A.) and R.B. Gregory (Kent, OH, U.S.A.).....113

The similarity in the dynamics of myoglobin and glycerol as seen from Mössbauer spectroscopy on ^{57}Fe
F. Parak, M. Fischer and G.U. Nienhaus (Munich, F.R.G.).....145

Tryptophan phosphorescence as a monitor of protein flexibility
G.B. Strambini (Pisa, Italy).....155

The use of a superconducting magnetometer to measure spin equilibria in hemoglobin
M. Cerdonio, S. Vitale (Trento, Italy), S. Morante (Rome, Italy), A. DeYoung and R.W. Noble (Buffalo, NY, U.S.A.)..... 167

Kinetic control of ligand binding processes in hemoproteins
M. Brunori, M. Coletta, P. Ascenzi (Rome, Italy) and M. Bolognesi (Pavia, Italy).....175

Resonance Raman and absorption spectroscopic characterization of the chemically engineered enzyme thiolsubtilisin; comparison with a natural thiolenzyme
P.J. Tonge and P.R. Carey (Ottawa, Ont., Canada).....195

Conformational and functional properties of haemoglobin in perturbed solvent: relevance of electrostatic and hydrophobic interactions
L. Cordone, A. Cupane and E. Vitrano (Palermo, Italy).....213

Molecular dynamics and energy transduction in chloroplasts and mitochondria
L.A. Blumenfeld, R.M. Davydov and A.N. Tikhonov (Moscow, U.S.S.R.).....231

Dynamics of oligomeric proteins
G. Weber (Urbana, IL, U.S.A.).....255
